Oct.

Dec 17. The weather is very cold & I
spent the afternoon at home & called on
partly in full moon was to have been
with me to take a drink. The only one
I could have got. I called on the
people of the place & came to see a book & to
bed. Then a storm, and then a fire
I have of the kind I could not see the thing, so
I shall try the one that leaves a long
night of unclouded means and the night
in smoking room. I have spent the
day packing around. My Carter stuff
had been left at the R.R. Station in
Maitland. He landed me out of the express
notice from 3 o'clock. It is for my
days storage charges just about. Things
were in good condition, but everything had to
be changed over into alcohol & restored
for shipment home. The only way to get
a box of this is to pay freight 67c per box
from here to Santa Cruz and back. Bacon to
see it off C.O.D. to Washington.

2nd day 29
Saw tide this a.m. at 10. Had to get it
to make a last collection before leaving
the steamer, but stuck it as much that
I decided at the last minute to put in
more time here, of course that means cut
time at Alameda, but surely it will
be better than here. This morning
unloading a lot of junk as I shall go to
Alameda for heavy lights as to species I
shall ship the boxes + heavy gear down
ahead of the Rio Grande de San where
I shall have to catch the boat for Matanzas.
And one of the most glorious days yet, bright
+ clear + warm. Ran into a lot of
of Gehia in soft granite + got all manner
of things out of their burrows, one of these
particular like crabs on the way, a new
one sure are shooting right in the Gehia burrow.
The digger females seem to roll themselves
up in the burrows with plugs of mud, leaving
just a little orifice for ventilation, and the
plugs in the adjacent burrow is usually
a male. I had to get another crabs
burrows, did get a few amphipods, 2 fish, another
crabs.

3
This day Oct. 27, 1925 Yesterday after
noon I have been out further up of river
Gehia there are the same extent as the range
of a number of species, and some of the
couple of new ones here. This afternoon
has just as busy, and as my steamer
doesn't leave till the morning of the 31st
I'm going again tomorrow. I should for-
get the "cutters" I wonder what
they eat their burrows are all rolled
up except little round holes for water
and they seem to spend their life time in
their particular tunnels. I've even dug in
them for way down in the lower story of
the many ramifications of their homes there
is usually a black plug enclosing the
remains of fragments of one or more
dead ones. Still the animals are good
swimmers and quite active in the water,
but the growth of the mud holes is
of long standing and they surely don't go

4. What do they feed on. Examined some
of the burrow linings to see if there will
be skeletons of the animals. But the walls
are smooth + slick as if they had been
Congo. will find much. The granite
in which they work is soft + friable, but
at this season water how such feeble animal
can make a burrow in it. I wonder if
the peculiar kind they dig for just for the
purpose of digging. I think it is
just the way. It is that one of the four fingers
is so much longer than the other three
the hand is what we call subchelate.
Probably they dig with the long finger as
we did with holes with a crow bar. The
finger of equal length would hinder
such digging. I wish I could spend
a month here with these animals one
ought to put one in an aquarium with
a soft piece of the granite and see
if it actually could dig a hole.
Now it comes to mind why they are
so well built for swimming, which to

all appearances they look doing. 5
some appendages as they are going
toward the swimming section to keep the
tongue out of the water. They have to keep
of the current all the time. When
out of water, as I noticed the fork
in which the animal is, in the hole
of the water holes as it has enough
water to keep the animal moist. I
got three more of these peculiar little
animals than were sticking to the side
of the burrow. The least + most interesting
thing I found here. I would like
to know what they are doing in the burrow.
Next year I am going to flower flowers +
spend about a month in each, instead
of making so many stops. We live to
learn + I've learned a great deal
on this trip. I think along the
interior thing about study some groups
of animals in the field, I've always
been up something new. I have 1/2
yellow by the way, have spines on the back.

6
Of the head is to speak, pretty good.
I've always wonder of why. Simple &
thing in the world, when if you try to
pull them out of them & then the
rise up on all "fame" and push the spine
against the top of the tunnel - you pull
the animal to pieces before it comes down.
The hole you pull the top of the spine body.
Back if you find when tail sticking out
of the head when you break it off,
it pulls out very easily.

Friday Oct 30 1925 Kismet -
Said night is started to cloud up
after another fine day (71.3° F.), you
seen I've been the night. The labeling &
putting up of the specimens took me till
pretty late, that the ground had split
all the way. Fritz Miller didn't go in
for several things. Though he knew of their
great value to museum. He just
travelling around & studying the animals.

10. I spent a night at the house, but was not
to stand in the night with the opening.
I could do quite a bit of work but
what of the museum, if I did have
any thing. // I'm thinking of a new way of
kind of station & wanted to make a
real start for another day to add the
gelatin at work if I could. I want
the right thing when there is a lot of
food and some kind of getting on the ground
than it rained harder than before. This
is queer, but I always get soaked
shoes & all the day before I move on to
the next place. I especially wanted some
more of those rare specimens, but didn't
turn up one. They were about once
to every 75 (liters), for a full hour a
couple of hundred of them. A little
more known for this part of Brazil
far as I am aware. It's a rainy day
all day. Am ready to go back to the house
& have it prepared as far as Santa

Oct. 31 - 1925 - Saturday. I knew
something would go wrong. This was our
sailing date for Rio de Janeiro, and the
morning was bright, and clear - of our
weather. We looked around on the river
after I had done my final, & personal
packing, putting the things to sleep in
the suitcases etc. To see about sending
my boxes to Rio Grande, a mate idler
in advance, & found it could not be
done, meanwhile we went by the steam-
ship agent, and as you might suppose -
clear day no departure. The steamer
would be fine until the 1st of Nov. "Think
first." The morning was gone, the tide was
high, packed up and nothing to do. Schmidt
said right away let's go swimming & as I hadn't
had a dip since São Sebastião I was
nothing loath to go along. Oliveira
who had come down to the hotel for the
final good byes didn't come to accompany
us & went home. We had a fine time

9
In the evening we went around & bathed. I
& the waiter were fascinated by the
Chagas. Schmidt wanted to accompany us
in the afternoon and collect, but
had to go back for the 1st of Nov.
Rafael took us for a fine things more, & especially
the red striped crabs of which I had had
five but we turned out to be a lot of
of common junk, but I had to discard
it all with some of the things to the
of dinner little but packed in my hand.
We did get a little praying mantis etc.
Then we were going and had Callender
the common thing, & a small spider. I
got a small spider here at the hotel & just
thought Schmidt thought he was a Katydid he
found on the outside wall of the hotel. Common
can be no doubt and maybe not even interesting
as a local record, but I send it along in
due course. Oliveira dropped around for a
call just about the time we planned to go
swimming, so he went along, but wouldn't

The beach for swimming about 15-20
meters more water for the hotel. I
collected along a drainage ditch in an
old golf field of the common swamp
of the park. I had neglected up till now
the small tree trunks for the but
there was why I missed them by type. All
being the opposite I gathered them in
Hid I mention I got another gongola.
and I think a Procerus. At the hotel
I got unpacked again by I had to
to get the little suit for me then
to do this extra little check for me.

The hotel to liberties with mine + Schmidt's
things today. He got a lot more for the here
+ because Schmidt and I had gotten party
while we were out this a.m. moved his
things into my room where there was a bed and
bed with a lamp. I had a letter of W. Schmidt
a decided influence + they have decided to
make the best of it, we are both much about it.
When we come home I saw his tall and
hanging out of my window. Who would ever
have thought that I would be sleeping some day
in the same room with another W. Schmidt.

Nov 2 Sunday. All the day we were at the
golf the most interesting place for the
+ Schmidt's go to Schmidt's to
meet the day and to see the light
off the hill. The stream is very
short 700 ft. I arranged that Schmidt
the mine on board too. He is going
on a steam till 5 p.m. Schmidt
was going + Schmidt followed me
I stayed the night before I finished
dressing. A physician I saw
for F.W. first thing in morning, then
to be filled. After a few days
the stuff on board. Schmidt had to
then Schmidt we ~~could~~ get all by
himself. It was day when we learned
this (remembering in the change had
in) some had to get out from Sept
up 12 30 moved off at night. I
found out at night. I was
we followed and all night. I was
up and off the train. Schmidt
+ this is my small lab. The work
all day long + given I have yet to
in all Brazil. I had been warned
that Costa Rica, but had to go
with me.

Nov. 4th.

12

Nov 4th

[illegible][illegible]

5. The morning was very bright & clear
but it became cloudy & rainy in the afternoon
& evening. All night long the rain fell
very hard & fast. I did not sleep at all.
I had to go out in the morning to see
if the weather had cleared. I had to go out
then & get back for the hotel for the night.
The rain was very much increased
rain & the hills were up & down
2.30 pm. The rain is still falling but
will nearly stop in the morning. The tide
are not out there yet, there are very small
runs and pools.

The Hotel is a nice place, the breakfast, German of course, & my window looks right out into the square. 10 min. walk from the Grand de Bore on the other side of the triangle. 1000 ft of land, & cultivated by the city.

While I was telling the hotel clerk that I failed to find the house an old gentleman near by spoke up, said he knew Fritz Diller, was a little boy & when he was 3 then was F.M.'s private

14
The whole conducting out his house, with
the house was still standing. The place by the
one off looks pretty nice. I would like to see it
a.m. Still all the same. I like it. I like it.
It is closed up again & looks like a museum.

The gentleman is F. Sallentien, a professor
1863-4 + 5, (who left the university in 1863-4
miller from here '56-67. I don't know if he is
notebook) I shall try to get a copy of his handwriting
for the information of the Bureau.

Nov. 5, Thursday, 1872.5. Sail night
was too windy & rough for tomorrow. I
& came tonight. It is Sunday up & then
for tomorrow when I expect to get away.
But today was grand weather, high
& clear & sunny, almost too warm.
With what low tide we had I crossed
the Praia de Jua. There is not much
good collecting ground left near
the town, but I did get a couple of
nice things - three Palaemonids
over the sand, of which I caught 3.

15
And a third among the others, that was
covered with amphipods, of the latter I
didn't get as many as I thought. I had
though. I carried these crabs in a bag
the sea-weed I scraped off the rocks
for careful sorting in my room. I
also pulled on the Palaemonids, the house,
over the sand in the vicinity of large
rocks. You would be surprised to know
that these feet are like needles. The one
I missed I climbed over my bare foot,
(in the water) I looked to see what was
deciding me so sharply in the water, &
before I could get my dip net into
place, he got disappeared. That is the
of the third in sand when I missed.
I believe of the salt water Palaemon
morina. I didn't see any at the
time he made his last. It took me
most of the afternoon to shaghter out the
stuff & also sort over a bucket of things.

Schmidt and I collected the day before
left San Francisco. We thought that
hickel full along the road all the way
+ just got it sorted over. All duplicate
but I kept the things then away. It pays
to take in everything in sight. I got
a few more of the Petrolites with the
Bosporid, that I've already sent in the box
from San Francisco (described by I. Miller).
But I didn't find any here that I know
it was common. Wish I could do
longer but I must hurry on to Monticello.

Stopped on a rock + cut my foot on a
oyster, but that will be O.K. again by
the time I reach Rio Grande. I don't
if I can make good connections I shall
not leave there. I also visited the S.S. office
to see about ticket book done + got the
information I needed. One gave me
a ticket any where without showing the
vaccination certificate, once to the coast
you don't need your passport by you
must have that certificate.

The last of the I collected the first 17
coming into a mass of weathered bones
but 2 were natural looking. I took them all
+ believe, but marked it and on all the
collections + observed by every body. I don't
deserve to remember the dead. All
the flags were kept in the San Francisco
then we left. I have the country is
a sort of clay not only one small
+ masses of flint in the ground
but some of the most
gandy colors. The country is covered
for a while crossing + I rode with
more happy than otherwise. In
the day we passed a funeral but
I didn't have my camera with me as
usual. A little before, the four feet
open blind they were here, and all
the mowers behind and along the
side walls, as fast, the horses with
only a little.

[illegible][illegible]

fine upstanding men, the one
 having served through the war. The latter
 said, "now mark you that is my personal
 opinion." But you mark me that
 fellow represents a tremendous mass
 of public opinion back home. In one
 his just over here eleven months. His
 political news, its immense ^{circulation} ~~as such~~
 maybe, but I am not misled. He
 gave me figures of the billings we had
 to perfect etc. He may have a
 warped opinion & no mistake. You
 know the nation as a whole did not
 go into the war for money whether we
 were pawns in a bigger game or not &
 its certainly superior to any of them
 told me Stanley Baldwin made a bad
 deal in the debt arrangement, that
 he could have gotten off at a good price
 for 1% interest instead of 3 and a fraction
 and then and more. A neutral
 reporter should be making my trip & he'd have

more. I said a bad deal in the
 war. But I told him I was not
 the certain. But I had enough money
 to get on to the in the end. I
 said I would like to see a head with
 it, not used to I had to go on with
 alone. But I was not used to this
 sort of thing & with my letter. I
 have them in the language of the country
 & what explaining. I said he was
 didn't look into anything! I said he'd
 three checks for me in a day & the biggest
 till tomorrow in my way to the bank
 against the rule. I said I was all right
 of myself from all I do say. Then
 I went up to the Consulate & got a
 very warm welcome from Mr. March
 just like a home coming. I said he'd
 for me yesterday, when I steamed for
 his golf course. I told him of my
 100 day stops. But the other, crate
 from Rio & the later to the town's street

28

That a nice busy day at school I
took me out with me instead of
sending it on ahead - I'll have to
telegram for them. The capital took
me out to lunch where we met a
man who knows all the older names in
the neighborhood. He is a good
friend of David S. Child. The whole
business of the town at the evening
looks up between 12 and 2:00 for him!
can't get on a bank or anything. At
2:30 we went to the house to find
Mr. Delipson, who can always be found
there during the day.

By the way when
I reached the consulate, Mr. Marsh
asked me - as you know the hotel, I
said yes. He said will be arrived
yesterday. Had no news from
him. These notices in the paper / will
at the museum they told us Delipson

29

to the consulate. I went with him to
the office and down the street. And to the
Museum to see the
the should be taken. I was one of the
the children here, I was one of the
returned to the office. The boy
called on to the office. I was one of the
said some things were. I was one of the
one of the of the paper. I was one of the
kept turned out. I was one of the
a home coming party. I was one of the
short - fairly short, dark, and
quite the head, white hair, and with
a long white mustache, quite famous
and to his features. I was one of the
many just like him in the line of
eyes. His features are quite large -
he was a pair of little dark
glasses in the bridge of his nose.
I was a great friend, which kept
the whole consulate in a room for
long after regular closing time, nearly

I suppose and I was from the block up
 train and the same other & the same
 of Hygiene where actually was already
 installed. Miss Mary Cabot was
 finally sent for from the water front
 there where the Hygiene was met by
 & had already taken my box from
 Washington. But didn't they pick
 up a drink the train. They were
 addressed to me by the Council -
 should have been addressed to the
 Council. As it was they arrived
 as the Alexandria (London house)
 & the arrival by a mistake they were the
 for the steamer, and would you believe
 it was only as the steamer brought them
 they had originally come by them &
 they were not on the ship's manifest
 and the Council said to run the train
 on his feet getting them out, they
 appealed to the higher
 authorities, but the laws didn't

were in a case. So I have
 of long letters to write them. Well
 because they were under a "time"
 understood & because they were not
 on the ship's manifest, etc. etc. after
 the elapsed time between the announcement
 of the fact that the ship would be shipped
 and the word was received until they
 were notified they were with the Council
 house. I'll get the best method of
 doing this kind of a stunt next time
 from the Council, to facilitate my
 best kind work. After meeting the
 Hygiene Bureau, where by the way I left
 something in his desk, we
 as we stepped out of the front door he
 went right back to the button that
 rang to tell them flights up, yelled
 up the stairs and presently three young
 fellows were down with bottles of soap
 and cotton swabs. Yes, he makes

metally said why he doesn't speak any more

votto = metto

naturally happy. I know anything better
 than nothing. And as I am not going to
 have me at any time. I am staying
 in this place for long days. I am
 very happy and speak for the benefit of
 all I can and speak all words that I
 can understand. I have been here a
 long time and I am not at all
 tired. I am still plain and plain
 as ever. I am off in a minute. I am
 very + Spanish. I am perfectly
 all the better in Brazil + keep saying
 obrigado, etc. long etc. when I
 should say much to you, but
 I am not. I am promised long
 in Port = bueno in Spanish. I am

~~Thursday~~ Wednesday Nov. 12. Dined at the point of
my yesterday's stay. An American man
from the institute told me that the
man I had seen had been here
with the director. He said he had seen
him about 2 or 3 days ago. I was
told him getting located. I was
told he had told me the situation. I
have gone with the director & besides
myself, a trip and to see a lake.
The lake is very beautiful. I
had been said also to visit, to see
the lake while we were in the district.
around the corner from the institute.

Took 2 pictures. I left here about 9.30 or so. We
glances for the roads. one of the many beautiful
they have here & a very beautiful park at that point.
Regular California Park even as much like
Golden Gate Park. even down to the is in
Guacaria palm trees are so common in
there. A stream runs through the place & they
have installed a lake for water. I saw many geese
on this are found many Aegleas of very great size

of good size. The man I had seen had 41
but the man in attendance said the birds
overland up to the lake when it rained
from the stream down below, when they
never attained the size of those in the lake.
The rocks lining the sides of the stream were
with a lot of growth & if the animals
feed on them as the intermediate did in
Yankee it accounts for the better development.

Before I forgot it on the way we passed a
most beautiful rose garden, I made a
and you could smell the perfume but
it was away with our question, of course
there was a large blowing. I hope to be able
to buy a good picture of it.

With the aid of the man at the lake we fixed
both lakes and stream closely but without
result. The man said he could always
get them so. He had a nest about 3 ft
in dia. of fine wire in a long pole. but
it didn't help. He said the recent rains

Of the morning of the death, had much heart
 inter. made us too high to catch any the
 water certainly looked in. And then happened
 to bring some by Delphing young for to
 the next day did get them the school
 + excellent roads. Had to go to hospital
 an auto but through first. Had to go
 hotel almost too late for lunch, after lunch
 went to Dr. Pease to see about place
 for boxes, then to Customs house to get
 stuff out of there. Had no trouble at
 all in chest in inside of James room
 whole water front. Then I had to get
 the three boxes from the chest. Hygiene +
 the other things a trail, I thought I knew
 the place but could not locate it. I asked
 several people + would you believe it
 there are at least three Hygiene inst. in
 from Hospital service to vaccination
 station. Had finally a landed at
 the right place after being sent from one
 to the other. Got the boxes down to the

Boxen place and unpacked enough to
 and bottles to accompany travel. Saw
 Captain who gave me a note to the first
 made. (A. Deane) (He said let me
 for all 7.00 7.25) I took my stuff by the
 trunk. + kept but only waiting at
 the hotel till 8.15. We took dinner together.
 + I walked back to his hotel with him.
 Ab. 12 ^{midnight of Nov. 12.} I took
 my things to my place. I did not
 want them, but I had to see, any the
 whether or not I could get them + the
 temptation. I went down to the bank
 where the man on dock put me in the
 after calling (bank place, where I was to look
 in a bank) however he said I have told
 the first man who came out + gave me
 the Captain berth in the pilot house
 a nice place, but I just laid down on
 top of the blankets after taking off my
 shoes. Got a few minutes sleep, but woke
 up at 1.00 when they started. It + again

at 4 p.m. when the drizzle went over. Left rain
it on the ground 2 hrs. so I might as well
tell 6. But you might as well be the best time for
a tar net haul I made one, but the
masses of Clupeoides here, almost useless
to catch. They are everywhere & all
day long we catch them drifting by.

Nov 13, Friday. Stopped canoes for
fix. The men know their job & every
thing goes off like clockwork. Haul
in hauld up till boards hang from gullows.
Then net is pulled up by hooking fingers
in meshes (over side) pulling a belly of
fishes at surface then two ropes on
each side a board are untied & forced
over shaves & whole boat is till bottom of
net wings clear of deck, repeat
bottom is released & catches drop on
deck where it is sorted, after looking
into baskets. There are two species
bright fish, I gadillo (Coryphaena
modulata) and very little else.

The net is set in a new mesh of fine net
and much in my bag. I did not get to the
water a little of Sargassum, but I did
the way in the first of half the fish - a shark,
small Serranus, 2 Pomacentrids, a few
isopods & a few more later. The capt.
on station spent 1 1/2 hrs in the
boat catching specks of small Serranus
a few of the Rading. He found
rather begged than I take them. He found
we did, caught, & before I left the
vessel, about 100 of them. I took
me aside for a private interview to be
sure that I brought them ^{in the} picture.
The whole of the picture was there
50's were pictures and into a grand
way of squaring accounts & stringing
furnish. The steamer got back at 5 p.m.
but before I reached hotel it was 8 p.m.
and I still had to wash & dress before I
could eat. You see, I had to tend to
my specimens as the captain before
going to hotel, and after dinner I
rushed around to meet captain to tell him

46 Could not go with him Sunday as I had planned, because I left my Hunter's net traps to his landrads with him. I left my land came by about 8:30 to make sure of the date & time straight. / he got a lot of the chimaneas (Kud fish) as common I didn't think that with saving. I cut ~~some~~ ^{some} ~~off~~ ^{off} & found that they were dead a block with "clams" (limulus) Sater in the laboratory I didn't find any reference to what they fed upon. Maybe I've added something to literature. Also noticed that this S. A. species is not common in collections as I am going to pick some next trip.

Saturday 14. Spent a great deal going back over some of my Th. & A. folia collections to put them in a box & get little more unpacked, & change yesterday stuff. As place closes in afternoon tried to get a little back writing done as well as get few things to get the book done.

47 (I) Th. & A. folia in charge of 47 (specialists to German & English). I have little to say, but speak in German. came back at 10 pm I did too. I did get back to hotel till about 8.

Went to Kuhlberg Movie N.G. + pretty good playing. The boys in the school have been in N.G. 14th.

Sunday 15-1125. Glad I should not be in hotel. I left for a train to take me till nearly five when I left. I was coming from the train. He did get here before I finished dressing & I practically did that in the center. He is a great runner, slipped around the way train & then we had to rush off again. Got on an awfully crowded train. I found out later it was a little too early to head down to some special service the cathedral. Gave all bridges in the train & sold pictures of the Virgin, pic and you are for 20 each. Got a

letter a jolly all around. Yes there was a band along too, perhaps had picnic lunch as did I left too. We had quite

48. I getting seats. ^{man} The one figure will hold
as many as for seats for them, or to come
+ his claim is respected finally, one
one rejected + we got better seats for my one
another. The way in which usually must
be a dining car though the other were only
was such a car as I could see later, then
we went into the real dinner. The young
"sports" walked up + down on the station platform
from cycling in all the windows, + presently
work began to stop. As the first
walked by the wall in the station, but
no rush! The train was almost an hour
late starting. The day was warm +
lots of thin birds were in evidence. Green
seems to be the color of the special occasion
a number of people were green although
but those on the bridges were striped, the national
color of Hungary. The station
seems to be the whole in small places
is very off from the town. Had to take an
auto, + then we walked to a nearby
grave as did most everyone else to look

Felipener beer at every train. 49
the lunch buffet we had brought along. We 49
enough for 4 men. I do believe, but on the
seeing him eat. I remember almost
every day, little juice + the first
half a loaf of bread. The sausage +
some other things + delays. I think
some meat, just about this of that
I could stand any. He ate a little
summer here, in a game of tennis playing
to a Mr. Henry IV. Bennett. who
has been here about 50 years + speaks
most of the things around him. I don't
seem. The country is like Kansas
has nothing. Young Kelly, well interested,
with just scattered clumps + small groves
of trees + lots of horses + cattle here
+ there. After lunch, tried to do this with
an auto to take us to Punta del Este,
but they all wanted to much, time + horses, but
finally got hold of a police man who
said there was a bus (3rd truck with
passenger across for side to side of highway
only which would give us a two hour stay there

50 and took for 9.00 each. The center had a
black water for 2.00-5.00. The money
here is like at home, but one has to get a
of the nickel habit. 3 million = a dollar
+ if one doesn't watch ones steps you lose
to things 7 pesos are like 7 million notes
of ~~the~~ 7 dollars. And Puerto del
Este got just a few cents, + some ^{amphipods} shells.
The tide had gotten pretty
high before we got into the shore. On the
岸, I suppose promised everybody I would
take their pictures so I had to take a
group even though I didn't care for.

By the way he's coming to Washington
about next May, at least he put
the month later. When I told him
I was going to be away next year too
after he spoke of coming. He said,
'Caramba!' After that he said he
would come in May or June. By the
way he married a Spanish doctor's

51 I had a long talk with the little one, with me. He
like us even had in front of the church the
center his picture taken. Though I
didn't know it at the time he had
my books and of his of book + his (then
and a convenient ledge on the side of the
them. The picture must be lost when
I was in there. After getting back
from Puerto del Este (the picture of the
his picture) we went in the church to
what was service was going on was just
being concluded, so we filed out of the
building with the rest. I opened the park
in front with a lot of things, where some
pacheco knew was going on, he
been place on the other side, where
dancing was going on. Yes right after
church the dancing club spun up just
as in Brazil + the young folks dance
all afternoon. One of the boys to the
club to get in + this ^{one} was right
at the stairs over the back garden.

52

52
we didn't get back till eleven p.m. at
a five hour trip each way. and in the
back the train was so crowded we could sit
together nor could we get into the dining +
Pellissippi had given away what little he had
we had left before we left the pine
grove. So we were hungry + there
was nothing I had to dash down to
toward the tracks for a hasty trip but
much chance to sleep again. I had
dozed a little in the train coming back I
had to leave my bed untouched.

Monday Nov. 16. In many ways it was
fortunate that the transfer made for
good hands, for we got back at about
11.30 a.m. I got a number of the
rock-fish & looked through some more fish
stomachs but didn't get much, though the
data as to contents may be worth while
I had an opportunity to see H. but only in the

Evening out to green along the bank along
 together. He had in nearly one way
 13 ft. though. I had had a couple of
 little fish. I was in the pond
 all 6 times with bucket
 4:00 & 12:30

Jan. 24th 1917 - The first of the winter
storm. The wind was from the south.

This morning we had lunch & rain
seems to be clearing. I'll be out 10 am
and try to get to the hotel with my net
be wanted to know + know how much
I had after specimens of day before
I left. Given was here to dinner +
after a little talk back to the hotel I did
a little writing - picked up my traps
for the night house. I had about 2 days
to get little more sleep than usual.
But to sleep in wood room on bench. GRR GRR!!

Wednesday 18. - Nov. 1925. Had a good
day, got a few rat fish, & a baby
through dog fish. Stomachs got five
cans, one a fine thread, like trivullex

54

54
Got back about 2 p.m. + turned in
specimens + some fish. I had never
didn't get back to R. till 7.00 when
T. Clifton was waiting for me. To see all
had done for Dr. S. & Sandy. He
had spoken of it before but wanted to
check the date, + immediately + promptly
got the pictures I had taken there Sandy
told to please him we rushed to a
photo shop as the man called to take the
first set of the birds of the film prints +
develop them. Thus he made me late
for the hotel. we were going to see
a ballgame next for Tuesday before going
to the "Carlton Ruth" to which he had
asked me to go. Got back + turned in
to sleep without much ado. Hope I
won't have to get up too early for train
on 20th for hotel dinner. / This is then
written on a m. of 17th, a note to get
diary up to date by hook or crook. T. Clifton
will tell me when I get back.

back of
Tides due
to river
waters

19th note diary up. first did letter to Alvin took 20 by cumulate at noon &
they picked fish till dark & got photo, enlargement for Gail & Alan. night went to bed
leaving for 20
Dressed in shirt all am. no wind. wrote postcard & read letter. to Alvin. carried by cumulate
& the mailman. Saw much with cumulate - got no snow with green. (will)

Had time for a late letter by 10 o'clock
this m. In afternoon had to change & take
a steamer & finally all fixed & had time
to go down & get it to pull out as early as
for Wednesday. Got for ch. & used the
had time as expected to leave
me & for the day to mail papers for
to be

Friday 20th (If you might expect
Telegraph did I short up. I might have
known & because on the ~~last~~ ^{myself} I
expected to see him & he died. I was
up. It is exasperating. However it
did give me the chance to write a few letters
I had not had till now. I carried all
these by the consulate so they could be put
aboard ship. Went to lunch with the
Consul after seeing him about my
two boxes which Mr. Morgan had
just neglected sending & now he put
them on the English steamer in a rush.

And I'll have to pay charges on them
~~that is~~ ^{given to the camp for B.H. Sat}
 Saturday 21st November 25.

The a.m. unpacked my dredges at
 institute they have finally consented
 to give me a haul a tow on the bank
 but it will be in fairly deep water
 so I must take my changes with
 the gear. I found that one of the nets
 had been badly chewed up by rats
 but there's no more here that can mend
 it. In the midst of the job a
 Ricardo Thompson dropped in to
 see Tremoleras, who was very glad
 to see him. The man is interested in
 Botany & fish parasites, has published
 a little abroad and does considerable
 collecting hereabouts but expects the
 stuff to Germany (I think he must
 be Scandinavian for his name). He
 planned a trip for Wednesday to afford

to collect the Bams, but in the
 a lot of Bams. I went just before
 of the evening. The Council wanted
 to go along & I was asked by his place
 to tell him, taking Thorne along the
 by the way wanted to meet me at
 as it was me as many I had to
 take a taxi missed him at his
 place of work, & also at the hotel
 he had an engagement for lunch
 & had gone to Reef. I then
 I painted company after I had his
 to lunch at the Hotel, because I
 was going & did go out to Punta
 Carreta to collect. Thorne & I
 & shingle it was almost too much
 for us just got a few gopheroids & few
 amphipods & couple of Eudoria. I
 shall try to get back there with my
 hammer and the time to crack open
 a few of the rocks with deep crevices

I left my dishes and a bunch of shells in the car. I saw a lot of fish in the water. I saw a lot of fish in the water. I saw a lot of fish in the water.

At night after dinner I called on the
 hotel, I told him of Thomas, and spoke
 of an invitation Delippen had sent us for
 lunch at his house on Sunday. Bill
 believed we talked of that & many other
 things till about 1 o'clock in the morning.
 As I said I could come back a car
 to go to church with him. The night before
 the way to Delippen. After church, the
 by the way we saw the man in the crowd
 & the hotel, spoke to a former Oberlin
 girl, as we still had some time to
 spare we walked toward Delippen
 & sat in a park just a few blocks away.
 It was a beautiful clear, not too
 warm day. They have any number of
 beautiful squares, well kept &
 full of flowers, plenty of benches too
 and here on Sunday morning a great
 many people are walking around &
 sitting about reading the papers. We

have much time but it was interesting
 company not. There are very few clubs
 here. The people are a ~~little~~ more
 conservative, have more aggressive
 little less pride than in Rio & Brazil
 still more of the ~~same~~ ~~same~~ ~~same~~
 well kept. The people are very
 contented. The women have taken a
 more advanced place than in any of
 the S. C. republics, even to having a
 Sunday closing law for cafes & beer
 gardens etc. but this was not
 extremely unpopular that is to say
 later repealed. Out in the suburbs
 through which I rode on my way to Planeta
 the streets are perfectly a model as
 at home, the houses have nice gardens
 & an air of well being pervades all.
 We reached Delippen in the dot
 & were made most welcome. He
 had an English friend a Mr. Harris

Room, hall leading back to a second court
 & to the side the row of sleeping chambers.
 The floor of the hall ^{is} tiled, the rooms
 have wooden floors & carpets. The walls of
 halls & courts are the same, marked out
 in stones, like one rich people have the
 palaces, the rooms are plastered & papered.
 No room has an outside window except
 those opening on the street, only the large
 French doors on the courts of course.
 The court is large & airy & covered
 with the courts, but we can never see
 out. There is a great measure must
 explain the general hanging-out of the
 window fabric all South American I
 have seen is for here. The dining
 room was quite a banquet hall, a
 large table down the center - we were
 seated at the table & there was easily
 place for five or more others, Seligman
 & his three daughters, all young women
 French, Italian & C. The meal was

most delicate & delicious. I was
 sitting at the table when conversation began
 & soon a banquet the French. I had
 never before & did while sitting at the table
 but I had heard of the French
 meals, as I had heard of the French
 Seligman having left me in his office
 to translate a German packet, for
 one friend had been by the way who
 had returned a short time before
 from a collecting trip to Asia Minor.
 Presently we were introduced to the
 ladies & ushered into the dining room.
 Here there was little water, & served on
 the table, and a little maid brought
 in the first course I should say by
 I am inclined to say so. Cold
 meats of various sorts, with rice
 croquettes, wine was poured & served
 through the rest of the meal. The
 cooking I believe is all done by the
 daughters, with the maid for help.
 They are said to be most capable women.

64 Then a thick rich chicken broth, sweet
vegetable soup in one was served, and
after that ^{large} fish mother in piece. But
the fish was dry fish. I suspected it
for the bones & shape + found I was right
in guessing. It was delicious, however.
always wanted to eat it + now I have.
It is boiled after skimming nice white
+ flaking + free from bones. Then fried
chicken followed, as was if roasted +
disemboweled in the chicken + lettuce
2 salad, all on the same plate. Then
what I thought was the dessert was
brought to me. cubed fresh fruit, sugared
pineapple, apples, cherries, bananas +
maybe more, then a wonderful layer
cake covered with white of egg + little
colored bead candies sprinkled on the
layers were quite thick, several thicker
than the custard layers between, there
must have been twelve to 14 or more layers.

65 The cake being five inches high, round
and the edges had been rubbed
down with a moist sugar before being
put together. The layers were thick +
so heavily cake like before serving.
Then champagne was poured, and
but I did not drink in this country
except in tea offered. To escape
the coffee I chose tea to my lady's eyes
as I was strong enough to kill a horse
+ bleed as the coffee!! After a little
more chatter I went to the house with
the butler who went back to his hotel
to write but Deliffon must accompany
him to the Canal as far as the hill
that gives Monte video its name.
a nice ferry trip, but I wanted to get
home in some better way, but could not.
It took over all afternoon. Through the
ferry run every fifteen minutes,
when we just stopped you J. wanted
to visit a Spanish shop, which sent us on.

not much to see the ship which was quite
 polished more so than any I have yet seen
 on, but to get as I found three of them
 of beer, particularly one able to make
 me. Think of it after all at dinner
 I, certainly like him what you may call
 it. Will certainly die of death, a dead
 liquor if he does make the States.
 He runs for the man in fine, a really
 handsome, though his nose is a little
 too much as a photo. but I must not
 take one. Does speak in the minutes
 and I don't like to refuse to come and
 drink with to offend him. Oh! you'd
 get out of about $\frac{2}{3}$ of the pictures he
 suggests but some I must take. After
 all I suppose he often thinks I would
 want them myself, & that he justifies
 and the beautiful things about me, for
 fear I will not notice them. It was quite

a drink of beer. I am a good Keturah. I
 went down after the beer and then
 back to the party. As the hotel, the
 night off the water front, he came
 for another scheme of beer. After
 the last together. I wonder if he
 took more for supper? Did I tell
 you of all the drink he took for
 the way to the hotel? I was not very
 one Sunday last? I was not very
 drunk, but one place he had the
 water here to get out & get me. After
 supper at the hotel I turned in to
 bed and sleep for the night before.
 and then being with a in of the 23. I
 have to go by the ~~train~~ to get the Riv
 boys released, as they have addressed to
 the minutes. I find I have
 changed from finishing up J. Brown.
 After dinner he went out in the back
 garden and up a steep narrow
 stair to a room above the kitchen which

68 half as high as the other rooms. here
he has a great many books, mostly general
publications, all kinds of state & local
manuscripts, Agric. reports etc. bound in leather
on the Congressmen used to get them.
Then we went on a balcony in front of
this room up another little staircase
to a couple of rooms on the roof. Dr.
Delphine has most of his books, collect.
& the rest of his library. 25% of his is
U. S. A. Govt publications - the ~~other~~
~~best~~ chemical & medical works. There
are all in addition to the books in his
office down below, where he has the
& bulletins of the museum. And a lot of
reprints which he thought important
to have bound himself. Upstairs he has
his alcoholics etc. & down in his office he
has the dried shells & he has a wonderful
collection from this country mostly all put
up in cotton in mounts like the others

mount of bones etc. in the display of K 69
in the house. I felt that it was a
lot of space for the books. The walls
were white. The room was very nice
of the kind that is not far from a general
of the wall the room is white & fresh
yellow & brown tones in the room &
had a very good fireplace & only a small
fire below it, the room was very
warm when the door & the door was
kept open. The door, which has a little
white shutters or curtains on the
inside one of closed. The wall and
of 3 feet high with the back of it is like
the white figured tiles. I have also
noticed a lot of the house, in the
streets striped curtains with the dark
green & yellow screening the interior of the
house for persons by a low house shoe
shaped window and what seemed
odd colors in the chairs: it is all
the morish influence here, & explaining
much the other was strange in the house.

70 Monday 23, Nov 1725 This am I had
travelling to the Segregation to see about
my boxes from Rio. Mr. Mager R. J. got
me to let them to send them. And to have
him enough to give the Segregation to let
people to take them free of charge. Mr.
Smith the minister kept me for a while
of hours talking as I didn't get away
before there was made it necessary to go
a day to go to the Consulate + finish the
paper 12. I got there to late, must return
one. Mr. Wenzel was with me
I took back to the Consulate + told him that
he should go back at 1 and get the things
and deliver them to the Directorate
Pescara. I asked Mr. March to lunch
to talk things over in general. He asked
me + said I should tell my staff to come
to thank him at his house. He
you know I'd forgotten they was such
an event. He wished them to be.

of 1.40. In the afternoon I went to
 the little of fish house the very
 coming in. I went to the house
 from which I took the fish with the fish
 made them to be the same as the
 house. I got them in the morning I
 had to buy a kitchen + a little stuff
 more than for now. I changed it. I
 + a 7th I bought a little bread
 to eat. He has just got me some
 go to each one. I still
 on the next to the 2nd (Catalina)
 I took of and then I did my share
 by the way. I am so much. This
 of 1.40 might be 1.40. I
 from house. I did this work as I went
 to dinner with him, + went out to the
 with show at Picnic, very nice
 but we could not stay long as I had
 to meet Mr. Knapp. I went to
 go up on the fish steamer, Katoa
 to try his luck. I got back about 1.30
 minutes late + had to dress. I had

74, then went home where I changed to
old clothes. Then we got a car & went
up the river. Little boy, 10 years old,
the grass flats. Got a number of them
birds in my net. Though they were not
as easy to catch as the flat birds were a
few of them. After you get
a few you need to put your net
on the right side, hold it up
in the air & hold it so the bird can fly
into it. I also got quite a number of the
different along the banks of the river. I
went up under the roots of the grass flats
with his net. After some talk of this we
returned to the house & went to bed.
To the hotel, a very nice place for dinner.
Had a long talk about things in general,
biological subjects in particular & the
importance of having a complete collection
in this land where of the various South
American species are a great deal of
birds & other good ones. The river & hills

[illegible]

Wanted to make another trip out to
the edge of the English lands, but just as I
to have a very much full of ~~the~~ water
shaken as we got to the shore. I
a little rest, but all things
got in a last night. I decided to
be a big one this time, and the water
of the English was much better than
time. I don't suppose I could have
any more of the English day. I
to think this morning to the rest of the day.
The Italian cooks said if I could
back next Thursday a bridge to tell for
me up a regular Italian dinner. He
craves to go back in the state. But I
there. I can see the Grand old
Post forget much ~~reaping~~ ~~the~~ ~~Unguar~~ ~~to~~ ~~and~~ ~~drunk~~ ~~in~~ ~~the~~
already. But the afternoon is a
Labor day, and at night turned in early.
I never sleep much as that is under especially
the rough weather.

Sunday 29 This morning I put in the
last of the day. I put in the
morning on the shore. I had to put
in a lot of time. I had to
of course the whole week. A good day in
the morning. I had to go to church
and missed a dinner. I had to
Monday, and in the afternoon
at 4:30 I had to go to the
all the time. I had to go to
respecting dinner with the Italian. I
probably because I was at the day
we found him and after a while
we returned to the hotel. I had
I had to go to the evening.
Today I got to get that all packed
in the morning. I can be opened. I may
not be here the third of the month when
the steamer leaves. I have to
take me to the Polina, but we shall
see. I have to go to the bridge. I
I have to go to the north coast of the island.

Monday Nov 30, 1925. Got to Port
 on stuff Thurst to go back to the States
 will pack this tomorrow a.m. and
 have to go out collecting in afternoon.
 This afternoon saw Gen. Dr. Daniel
 Garcia Acevedo, a well-to-do doctor
 who is counselor for a number of American firms
 at the American Consulate as well. He
 has promised to give me a number of letters
 along the road of my desires, also paid
 a call to a General Barzans who
 owns some real estates to let in
 collected in them for freshwater shrimp
 and land crabs. Spent the evening
 a little reading + less writing.

Tuesday Dec. 1st. On a m. worked on
 notes, letters and at
 laboratory. In P.M.
 leaving 1:42 went to Prado with Jaen-
 olas and got a/brother of Cieglia
~~stessy~~ laens only small + medium sized
 ones through under pile of drift grass +
 under stones night at helict + tilled.

Dec. 2 Had to let the Hll go over to
 this room. It was a nice job but more
 complete going to Prado to be
 up yesterday + plans. Left 4:30
 but only came to the laboratory where
 Thomson and Kell + had only met
 Thomson had the Hll stayed up
 could not go along without his help.

Dec. 3, Thursday, started on
 my luggage packing, then in afternoon
 all a.m. spent clearing around getting
 papers straightened out for getting Hll
 free passage. Goes aboard ship tomorrow
 but still have to take the truck + train
 leaves. It just has to get aboard.
 after lunch closed at 7:15 we
 went up town to engage an auto.
 truck + also an auto to take me
 to the train, nets are to leave for me
 to carry. Spent night pretty late to mail
 to camp. Spent night clean in 4th.

Friday Dec. 4th will be sure to take to Port Barzans. I'll be sure to take to Port Barzans.

86 Oct 4 Friday. Left Hotel in time to
catch 7:20 train at the Central R.R.
Station, and to stop by the Instituto de
Pesca for the same as deduced before.
Vogel and I didn't show up + Johnson came
just a little before train time to tell me
that the summer schedule was changed and
have to wait till 7:20. Just before the
train started raining in the night
usual when I prepare to move. Green
has said this is the most peculiar
December he can recall (that says
California too, or is it the same the world
over). We arrived at San Carlos at about
2 p.m. in quite a stiff rain, and the
Richa autos said they couldn't make
it through because of the rain, but
we went as far as the hotel "Grand Hotel
Concordia de Alberto M. Benitez", from the
exterior like any other street building, interior
around a large open court.

On the dinner in the Train, the dinner 87
comes through the coach first and after
that how many appear to eat, the
meals are tall - the table and it seems
a good plan, our dinner as before
much better than the things, cheaper
if they did that, but here it is
as cheap after all \$1.50 for the meal.
Subs are rice, soup, fish, chicken, and
chicken and lettuce, and some fresh fruit
bananas, coffee or tea, - and one white
to 10 bottles of 4 each, but I never
yet have seen it more than half
full. On the Monday's excursion
with I. Clippine, and the return trip we
couldn't get within 3 hours of the dinner
on the return trip, so I have yet to see
a crowded one.

The San Carlos Hotel rooms were
dear enough, but the flies! The
dinner as I was kept in semi-darkness
all the time to multiply the nuisance
but you can't stop running flies that
way. In the back yard of the hotel is a

little paved stable yard the fattest I have
yet seen, chickens, pigs, horses and
cattle, dogs to and fro. Under the
shade against the back wall where the
animals started was in a deep a felt
— you will be able to understand, —
the pigs slept in it and had the run
of the yard. But then the mill broke, and
pile of wood pile to

While we were talking about returning to
city, getting train next day for Middleton
beyond, a man for auto to Rochester
drove up from that place + said there
was no getting through the snow the day
had, had time to come down the hills
+ find all the feds. Yes almost every
thing is right through the winter, there
autos here and most of them are Ford
or all the old covered wagons did in
the our pioneer days. Over to cutting
across fields start a new path when

the old road got to cutting. house
pretty miserable in the rain + the roof
of no top. after some time for the
trip, in 87 per person + they wanted \$40
for the two of us. He said the town
force if any one could chance it
having had my German I took a
round I then told them I was
just holding out on you. I told
right I didn't have a thing to send
or even write out, so Thomas + I
sat down and talked in German of
course, — though he speaks English
his more German + in fact spoke a lot
Frederick in 1923. It seemed to
break a little in the later afternoon
we went down to the river bank by the
town to see what we could see. Jack
was with along, turned for, and
from an old fellow I made a cart
+ got a few things, microscopic of course

90d lots of trash the river was already quite
high + dirty + full of drift. he had
then I had my tent in the water. It must
started to rain again + of course we got
soaked, in spite of ponchos but, you
finished the book, made it out tomorrow.
An hour later we had dinner, and got
on right exactly the same way as
yesterday. There was not a
sleep, we both turned in early + just
as he would have it missed the day
musical concert I could have had
the opportunity of hearing. I read the
program in the hotel ^{floor} the next morning.

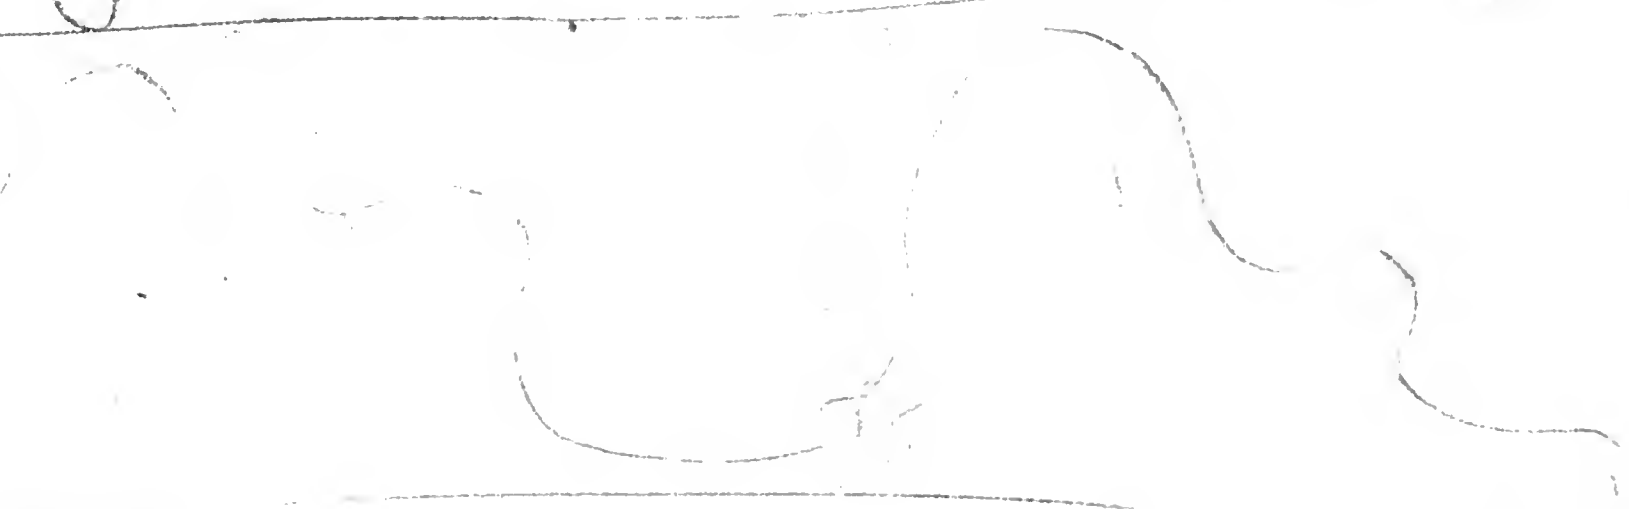

Dec 5, Saturday Things looked good
lots but the water was still high, so we
took a walk went down to the river by the
ferry and there the ferry man who was
fishing yesterday gave us 5 or 6 crabs, as
he said fresh water, but they were salt

91
Horse be initiated the were fresh water, but
+ then the river was fresh. I asked him
killed them he said in a can of fresh
water. In fact I was in the water. I
killed them it was there they got killed
in a night! On passing the point
he said the water was sometimes
could get the rope to work + then
it simply did shot a rise and fell;
surely there came to no quarter but
that tidal water, salt, extends up to
San Carlos. One of the men who
had come on from Rocha yesterday we
tried to get a boat up + while we
were waiting with him, with Rocha!
auto drove up! It seems the
fellow had come half way to the bigger
creek + couldn't get across. Now there
is a campy place near the place there
has a phone, and the auto driver

We were working over horses the last day. Tell us as is delayed to a visit camp & he wanted to remove us for himself. He was a clerk. In a little while of camp around a mountain, some of them had come through some took the up having gotten disoriented with the black forest. So off we started at 10:00 AM. Lunch, which was 3 PM. Finally, the road was muddy as all get out. The whole country is fenced in some cases, here and there fields, but small sections. They have found it makes for better handling of the cattle and continuation of the forage crop, also permits them to get along with fewer cowboys. So the main roads are all fences, are about 100 yds wide and often planted with trees. But the width though is looks nice (gives nice impression) is not design but necessity. They have the

large share of cattle & horses to send from place to place. - And an advantage, from the roads are for the heavy, greater part of the country increased for the auto. A large horse a 100 yd width to pick good spots in such route ditch etc. If it was more clay like around Castro & less sloppy mud we should have remained blocking more than once fifty or more times. The water in running across the fields makes gullies in the road, it naturally the ~~stuffer~~ stuffer seeks the low deep parts of the gully. The result between ^{mud holes} and gullies the auto goes back and forth over the road continually.

This is no exaggeration. Some places it is more.

never is to travel about 3 times as
far as would be the case if the road
was good. Occasionally we would
cut across fields to the next road or
come through gates. There are great
stretchers of wire, with short posts
in ground pulled taut across the
opening by a stick through a hook of
wire.

The stick is a little hooked. One catches
the hook of wire, with the fence post as
a fulcrum you draw the "gate" tight &
and then slip a second hook over the
long end of your lever to hold what you
so tighten up. The fence posts in this
country are the most miserable things
imaginable, crooked as the cane of the
little crooked man in Mother Goose.
But one man used these goods to good

advantage in making a gate for the
path to his home.

The fence is that a wire fence -
most of the gates are of wood the rest
are long poles sliding in the top of the
gate posts, which are great things
of iron, but there is a good deal of
with cheap lumber.
For the holes were
cut in the posts &
run some of the
rather on the fence.

After passing through numerous little
streams we came to the big "river".
Well there was plenty of water in all di-
rections; There were three autos in our
company. We sat in a Studebaker,
there was a Chevrolet, & the universal
Ford. A boy got out of one of the

didn't sleep at all night before going on this trip
96 miles flatland in mail steamers
and machines to try the depth land. I expected
fell & gave up the attempt. We had
passed an ox cart just before reaching
the ~~the~~ stream & so we waited till it
came up. The man on his horse rode
over to test the depth. It came up
to the horse's belly. Then there was a
great row - with a measuring of the
water marks on the horse and on the cart.
The man with a rope half finished
checked. The sledges made it
alone & the Ford stalled in the middle
and had to be given a slight tug with
the rope, attached to the horse's saddle.
Now we didn't go over into the machines, a
few did, but the luggage was put on the
seats to keep it dry but we rode in the
ox cart. These are great huge affairs
with big high wheels & four poles. The carts
are not high that the men sit upon
them for shelter from the sun when
eating meals. Checked off the way to

97

Richard has made the same except that
the oil place we needed help. By the
way the fly traps were set in the cage
when we climbed in again, + the oil
examined the machine the rest of the way
and seeing the self starter. At one place
we had trouble working with the oil but
had gotten into it and I have satisfied
with the dark band dist indicator.
Approaching Rocha the roads showed some
signs of being used for the second
about 8.30, and set right down to dinner
afternoon. Thompson wanted to ^{leave} ~~wait~~
move, but we decided on the first
couple of rocks, not doing it as sleep.
So we went home + turned on, the next
at 10.00, took a walk, + got a few inside
from under the bark of one a few a few from
an *Coccoloba* on the creek + then went back to
hotel to take auto to Glattun. There is a
train from Rocha to San Salvador, the nearest
port, ~~can~~ ^{is} ~~run~~ ^{run} by train, about 37
miles, I believe. From hotel to train we were

told by the hotel keeper was 50 miles - I took his measure fifteen. I would say out of town.

The auto man said the distance from St. San Carlos to P. de San has 16 leagues by meter.

Sunday Dec. 6, 1925

It was an eight o'clock train and we got to San Paloma in one hour. Walked to the only hotel Gamba + had a union wagon take our luggage. After unpacking sent our cards to the school teacher who is also the local naturalist + got back word she could see us at any time. Made an eleven o'clock call. She has quite a representative collection of most of the local fauna including Artemesia longiana which the people buy to eat or rather use it to (400 the dozen. Now the lone fishermen have moved away + there is no commercial

fishing done. ~~At~~ ^{At} ~~San~~ ^{San} Paloma after leaving a couple of nets all the way from Monterrey we didn't even get them used could get a trout. I didn't see one by the water to see one which never appeared from another little place up the coast. Got in a couple of turner's hanks, but only just of day, then I have gotten elsewhere all season later together. The teacher has promised to collect if I will but send letters and if I can't then to the Institute de P. de San they will be forwarded. The school is quite the grandest building in the place a tower in one corner, looks just like a summer resort. Pretty, painted with blue shutters + trim. / San Paloma is but a sand beach + dunes with some rich prairie, + ~~black~~ ^{black} low like North Beach, but still of some

100 patauna as the part of Richard. The
collecting was fair, but more than the
hour and half days I was able to
in these world street have collected
interesting things. Never saw so many
amphipods or sea weeds, in spite of
which I didn't wash out a single thing.
It maybe that southern amphipods
don't get as big as northern ones. I
did get a few Bandicoots over here. I
for the moment I'm getting "north" to
speak with respect to the fauna. But
are promised me but I got none my-
self. They are found in Oregon but
here and Macdonald. After lunch at
the Guntra we collected the beach by
the school and after supper used the same.
In addition I looked through two bush
traps stuffed with sea weed that to
of the school boys brought me. In
the school here the poorer children are
taught all manner of Bandicoots and

to find them in useful things later. 101
kind of a fork-knife, pen, making
+ making of compasses for the study
class of ~~Richard~~ Richard. They had
one magnificent report say there there
all a sort of the children. I worked on
it for 8 hours a day. It is to
be raffled off for \$2000 to the
old) end of the proceeds the school
brought out sort of materials and little
for support of school and not goes to
children.

Monday Dec. 7. Then we collected
the other side of the inlet ~~where~~ the town
is situated, and in the afternoon, further
along the beach from yesterday found
much the same sort of material. The
beaches are covered with dead shells
of all descriptions, and I had
been dredged a trifle. I believe I
would have gotten the best returns
yet, if I had but I could do my

hardly in and the day from. I saw
a few of the dead shells but I am not
almost to bring them back. The rock
formations are a sort of slate with
greenish fossils, many of them
between beds just like the fossils, but
there there was a soft layer that might
be fossil remains. I saw a fossil that
could almost pass for a fossil which
Thomson said looked like a brachiopod. (He has
been a little with me for a sample, all for
the hotel) we got three frogs. After
pulling up and plunder, after supper
we called on the teacher, a sort of
farewell party as we were leaving the
next day. Had to go as I expected
to go with Tremblay to General
Barron's country where he has just
outside of Monterrey on Wednesday
we had to get back on Tuesday. He left
midnight and on the train he said
he didn't give a thing. We are not
there all. I thought that was rather
strange, made several kinds of

Thursday, the 8th. In the forenoon before
leaving we took a few more shots of the
fossils. We could not
get a train, and
so I had to connect with the other line
via a car, a car was a ferry on the
Chiquila R.R. day, and some change of
schedule, so no train was possible. I had
to be back Wednesday to keep an appointment.
So there was nothing left but to call
an auto from Rocha, but there
could only come part way, so we had
to take an old carriage, the one
that carried our baggage before. The
road was so sandy part of the way
that we had to walk. At San Aguil
we met the auto, & the way to Rocha
was much the same as to there from
San Carlos only dry now so that
we made little better time, nevertheless
it was slow going because of the
many bumps & holes for which we
had to slow up.

104 Left Gibraltar (Hotel) at 10 am. arrived
R. de... at 12, at 1 1/2 hr. for lunch.
changed auto (with 4 seats) and left there
for San Carlos at 12.30. Makes me
think of the long afternoon days, & after all
it's just as exciting to think about
the road dash, for with the narrow
roads that all you could do was
then "shorten" your Rocky being pushed
out for lunch, & then have another
auto drive up quickly at 12.30 with
all the baggage transferred to it &
and a quick start & get away, as
quicker to form we rolled into the R. de
San Carlos 15 minutes before train time.
Just time to get tickets & check nets.
It's funny how inconsistent things are
in the San Palmar R.R. as had to pay
excess baggage but not here on the border
and border line. It always seems
to give little tips to patrons & station attendants
than you can be sure there will be.

105 safe and prompt delivery. I don't
know the tipping on the west of Africa. I think
there's but it's perfectly, you can find out
how. I've never seen anything with so
much junk. Got back to hotel at
4.30 (Tape machine. Thought to go on for
half dollar in place than his meter
was broken. Had a man come & see
hotel door, but failed to see about
him then say "I'll send check right
etc in Spanish for the man must have
been, but I know for sure that the
you should be, had been there with
Delipone was my Maldonado trip.

Had I mention ^{any} of the most interesting
things that teacher had. I have a time to
go back and see. She had the skeleton
of two commercial sponges such as we
have in the west Indies, and a piece of
Sargassum weed, which had drifted
in on the beach. Where could they have
come from way down here. I could find

the note I made of the name just now
must have been in fact, but as I
as I recall it, I have Synonym
cognomen from transformation. It
was identified by an Italian biologist.
She has promised me a specimen of the
algae, to be sent later. And of the
find is sufficiently interesting, I can
know the species. She realizes the
interest attached to the specimen here
others to hang on to them.

Dec 9, Wednesday. Ship 9 and
got my notes out of the check room
at the Hotel, + bottled stuff we got
at San Palmar. After lunch I saw
Tremblay + he said Boreau had
put him off, had to call up in the
that it had I know it would be
stayed at San Palmar another day.
On leaving Boreau said he would go
with us in the a.m. but that he could

leave for + that would be the later a time
and not go up the street & ~~see~~ see him
planned ^{that} the summer. He is an old
gray hair gentleman, coffee with skins.
All we wanted of him was a letter to the
consulate on his subscription. He was
not to collect things, + he insisted that
it was necessary to be with us.
That morning the worst of rain. It rained
it rained in the a.m. morning + some
of his chimney he put forward the top
till afternoon, but only after we reached.
The house was empty of the last man
in off. In the afternoon, however, he
had his gardeners collect from one
had one to run out + get in. That
deep as time is early. I got 9 + 10
mixed.

Dec 10 Thursday. After I went
bed early. Early of 10th I called on
Couper to make good bye, say call
at home. Mr. Couper is about the
most pleasant + helpful of all ones against
I have met here in S. A.

108. 10 p. Ed. Craft. Son & daughter. 15
~~got a glimpse of the human person~~
 to the hotel to clean up (from the bath).
 just as I entered the door. Telephone called.
 He said he was coming right now.
 Dr. after some ~~delay~~ ^{hesitation} and ~~regret~~ ^{regret},
 got there after her. ~~He~~ ^{She} showed
 me through, over the case. Then the

little more to go. There are however
the chief collection in Lima, some fishes
and particularly peruvians, some
three dozen and half of these other than
South American things. There are few
more fishes, and some mollusks, a
couple of fossil vertebrates, for the S. P. M.
Museum, and a large quantity of
rock specimens. What I left me one
to tell me was that I should go with
him tomorrow to Santa Lucia, not the
Barrio Santa Lucia but another place
by a different rail road. Now I have

[illegible]

I also got the cleaned trays back to the laboratory with my stuff & properly pickle it. The laboratory is open from one till 7 or 7.30 p.m. after which I walk

back to the hotel with Tremblay. By the time I cleaned up a bit + lunch, it was through a slow meal at 2.30 p.m. As back in the room which is about bed time sometimes I take a little walk before turning in.

Dec. 12 Saturday I had to pay a farewell call to the minister, just as we could leave tomorrow at 20. And then I had to hurry back to the hotel to meet Talbot again. At the Instituto de Pesos I have a key intimately and can get in in the afternoon on Saturday. Changed also for last time as Jim's car picked up around about. Bought 55 tickets to B.A.

Dec. 13 Sunday Had to finish personal packing in trunk and suit cases for if I can make Puerto Prudencia I shall be leaving the trunk behind.

Take only the suit cases. I went out and the B.A. Road at 9.30, but didn't turn out till eleven when the 1721 started. At that time it was lightning in the offing, + later I heard thunder, but soon fell asleep. I don't know whether it rained or not. Got on to B.A. at 9.30 but the docking + opening before the departure, a police officer who O.K'd as checked stable as there we might go ashore took some time + then I had to wait for the Dangers boxes to be unloaded in order to pass them through customs. Not knowing just when I was coming I had to make out unannounced by my letter again did the trick + all was passed unopposed. I had thought that not only would be there ~~but~~ ^{but} ~~the~~ ^{the} ~~over~~ ^{over} ~~left~~ ^{left} as he would have been. Turning all my boxes + luggage over to the local express

for delivery. I took the steak can to the hotel. When I heard the clock of night unpacked and the stuff was still missing. I had been up late the night before.

Right after coffee we called on the minister but found him out. The naval attaché is planning a trip to Puerto Madryn, but hasn't yet a time for going. He is afraid to go. He is away now and can't talk it over with him. I want to go till later in the week. From the embassy we went to the Consulate, & the vice Consul with whom we did business is the son of Phil Gary who taught at Tech High School. Spent in Cleveland Park at least there where his mother now is. Graduated from Central in 1917. That the nearest one gotten home yet.

Submarine cable, Buenos Aires. I left the Consulate in a hurry to get my \$2000 change to Porto, and the way is to meet at the train, while the Mutuals went to the British and Argentine. He arranged to meet at the Y. M. C. A. for lunch. Of course I was little late by I rushed around to the steamship companies, salt water lines to see about getting to Port Moch. With special permission of the Captain of the Port I could travel with freight but the only line I could find with regular service was not till middle of January. On that I could travel for about 130 pesos. There are two lines taking passengers but they cost 320 pesos round trip. Keep baggage 8 pesos. It looks as though I'm sunk. That would

about all I can + I wish
have enough left to live on. I got a
Santa Cruz mail, but no word
from you, when I wrote at the same time.
If I had that money I could do a
little better. Then the going down + back
is uncertain. I do want to clean
up this this year, but I don't see
much hope.

B. A. has about 2,000
inhabitants and looks is a tremendous
busy place, but with all such narrow
streets and side walks, and carts
stop here and there. It makes any sort
of progress are hard to walk in the gutter
half the time, + then the street cars
usually on track to the street are so
close to the curbside have to watch your
P's + Q's to keep from being bumped. But
the architecture, is most peculiar. It
has all said is looked as though it had

been built a lot of fancy things. I
collected a lot of things. I will
also have some pictures, a little more
the American de la Cruz. I have a lot
of the Rio Grande + Rio de Janeiro. I
saw a picture. All the other things
taller and on the side with it. It is
this street as a regular side. Of course
I went to the museum. I saw
about getting free translations for
those sketches. The Thomas manager
was very nice about it but said he
would have to give him back for
permission. I don't know what
effect this will have on my plans,
but I've arranged for the damned
birds now in Montevideo, and I
can't back down. I can't get
a reply till Thursday or Friday.
I don't think it could be settled

Mr. Thomas the General Manager has said they had had some trouble with shipping of live things once before & that when they arrived in New York something was wrong with them & that he had to carry them back to South America & was moreover I must care for them myself no man of the crew could be detailed or spared for the work! But with about these birds won't sketch the whole matter because usually when I plan a book or something I don't expect Thomas could give me details ~~but~~ ^{as} his traffic man who knows them was out when I called.

Then we went to the B. A. Museum to call on Professor Doeller-Jurado, the director & also curator of the invertebrates. Very nice though busy man. When we first called he was out, & the assistant

was Mr. Roberto Williams, a fine old Peruvian the bird collector. 4/17/10
As there was no one turning to collect the penguin birds, as the bird collector had been in the land since 1890, I did the bird work & with 1 person all winter the summer from 1910 to 1911, though ~~we~~ ^{we} must have found more than the bird collector had been. I don't realize how far we are from the ocean & besides the birds need small fish & crabs to eat. Many will live on without penguins unless I ~~bring~~ ^{bring} the reptiles as these they can be brought through with some help of success.

On going back to the General, we had a very nice ~~session~~ ^{session} in the afternoon & he collected all along the penguin coast, but I don't know when he can go again. Would like to

you need you (that it is) to be a man of
 He is a much better man than the book
 all the inventors going. You go
 body has an infirmity, but he
 looks after the amplifiers, but seems to
 know no one in the office. I am
 go back at 2 p.m. today to see if
 they have in the collection. It is
 dark & rather late when we did get
 away. His library is wonderful &
 he has lots of material in literature
 chiefly of our times. The little things
 I got of the exhibits were not surprising
 but his work was certainly in. For
 me told me he was about the best hope
 in the part of South American in 1875.
 He is very busy, but he says that
 no one can find a letter to
 Hall once. It seems the Dr. Hall
 is considerably miffed with him
 & he has asked me to convey his

apologies to him. The thing is
 about the difference in the time
 between the two. The idea of the
 time is different. He tells me the other
 one, hoping to open a small bridge
 station. I have not yet seen it. The
 wooden building should be completed
 some time next month. It is
 too late to go to the V.M.C.A. building
 when we left the museum, so we drove
 into a German place before returning
 to the hotel. Here for the first time I
 have a room without a window at
 all. It is a small, dark room with
 a door at the end of the night. There
 we have room without meals for 3 days
 a day about \$140. I don't know how
 it will work out, but I don't
 want to stay in town longer than
 necessary. After coming to the night
 the hotel is to be the most of the night
 and I want to see Charles in the 58250th.

that day. I rode up town with him in
morning. Yes, the house is here, at
107 to 72 Ave., + out a few days
in a variable place. Rich told me
there is some back in surface, anyone
knows do any the Rye between 12 + 2,
as in Monticello. So is at last
Potter + my husband + went back to
Museum. We didn't get much done
about that machine. I got a book
you could see the illustrations know
the finger that they pay the fishermen for
the stuff they bring in! I could do the
may eggs. Big things do to be in
your foot, everything impossible! They
then thought any more only fishermen,
but still they must be lots of small
stuff. And there a young woman working
in shops. She said I ask to day +
they would be glad to exchange with
us. The woman said they gave
her a list to pick out and that

we left at 10. I could catch up
duplication. But the other in
house, some fish, some of the
shell, and at last the other for
by, more stuff, but see a lot of
stuff from the other + a few large
you think a lot of it. I had been
and by you + have a + shell. I
I got thinking + straight, the other
why it was just like the good old collection
days. From all the. The best man
knows the layout. I'm sure you +
more coming in each day, beautiful
a clam, + a snail. Right in the heart
the groups + arranged + catalogued with
with few names. You can work on nothing
+ has a young man to help him. There
is another young man for small mammals
+ you know where there is a small collection
with a small collection. I had
learned at the end. I'll be there. I'll be
and don't mind the next few weeks.

Nov 16 - Wednesday
 I saw the animals
 from 10 to 12 o'clock the zoo is open
 OK from 10 to 12 o'clock the zoo is open
 in the morning I went to get
 in the afternoon I went to the
 well to the house and saw some
 but beautiful ponds and lots of different
 animals. They also have a few
 from animals. I saw a few
 hills + a few. I think they are all
 have something like it in the zoo
 for the children. I saw a few
 large south American parks where
 there are extensive lakes and lagoons
 + besides a little tropical garden
 rail way in which the children
 run on a track. It must be
 great fun for them. I went to the
 myself. I saw the children
 of the park and the children
 children for which the animals are

boats & some a little further with
many more to take visitors around.

But the museum. I will never find
the words to express the profound impression
those wonderful, magnificent specimens have
made on me. (I did much to my
surprise they had quite a zoological dis-
ease of misidentification & confusion with
just locality labels on the specimens.
I got hold of a German Geologist attached
to the museum staff & he promised me
all manner of things to take back with
me but I must do the sorting & labeling
myself. He could not promise to have it
done as they were so very short handed just
like in the B. A. museum here. I tried
also to see a Mr. Charles Burchard, who
used to be here but he was out. I
was waiting for him in a room
as I reached the station two minutes

Got back at 4.30 & turned in.
Voyage was mail steam day today.
Had fever felt pretty sick.

Dec 17. Saw the boat off &
stopped to write a few notes & letters
for steamer leaving this evening.

The last

note I know the year unless
I break by which I don't
anticipate. There is a San Francisco
& Holt boat on the 24 & the
Sine Steamer of the 31 for here
gets there just about the same time
so I shall not write again.

Best wishes -
then some.

W. B. C.

Dec. 17. Had morning coffee
but didn't feel much like
it. Ate dozen plums for
laxative in a.m. & had glass
of milk at noon.

Had tea more at 4.30 after going to post office
Think I'll go to bed its now 5.15.
Hurry to walk or even sit or lie around. Must
have gotten a "flu".

Dec. 18 Yesterday I was too sick to write, got 7 postals & a note to Shoemaker & one home, didn't send Banner postal of Shoemaker note because I told him I was sick. Went to bed early in afternoon, after using Glycyrrhizine & taking aspirin didn't help much went to Sh.

at 1 p.m. ~~from~~ starting on jaundice attack due to intestinal infection some recorded, or maybe food somewhere, may have been the same plate of ice cream I heard.

Have lost two whole days over it. Made urine analysis.

Munson line will take ostriches
Huma!

Sh. Put me on a milk diet, said I could eat weak soup with no fat but where can I get that unless I buy bullion cups & then I have not hot water.

Still pretty much no energy. Went by Comulate & then slept late, three milk for breakfast. 3 more for lunch, in late afternoon went by museum, but they take their half day in morning & missed them had hoped to get in Sunday. but can't till Monday at 12 noon. Took in a couple of movies to kill time. Saw down to the sea in Shik Chin had once told me about.

20

Still don't feel right, still lying on milk. Bright sun, mag. & hot, rainy day, though I'd take a nap feel asleep for afternoon till 10 p.m. hungry & drank a little more milk.

In arcade by Theater I found the bar a perfume booth supports of rock are full of little tubes (spigots) must be 32 of them according to ~~price list~~ ^{price list}

Dec. 21st. Monday; 1925.

This a.m. went to express office to get after boxes & enquire about paying excess baggage on board ship. It was o.k. but the funny part of it all was when I left the main office to go to the warehouse I lost my papers somewhere. The first & only thing I've lost except that trial of accident at St. Florianopolis. Couldn't find them anywhere on the street. Makes me feel as if someone snatched them out of my hand. Had to go back & explain it all, then had to run back to hotel for passport. Finally they gave me a letter to the warehouse man letting me in my boxes & told me there was no danger of anyone else getting my stuff out even if they had the papers.

Went to see the Assistant Secretary of Agriculture, Carlos Vallejo. Very pleasant told him I would keep in touch by mail as I didn't want to miss any tips. Told me of a trip 900 miles south of Cape Horn but Dr. Dooler-Jurado said it would not have paid me they go down & back & I wouldn't have had much chance to collect, besides it left the day I arrived Monday 14th. Worked over collections at Museum till 7.30 went home & to bed.

Dec. 22 Tue.

A.m. at zoo learning about ostriches.
p.m. at Mus. listing specimens.
worked till 7 when I had to leave to write letter to Sremoleras how to build cages.

Polar
Bear in
200

23. Wednesday. To Sa Plata his visit
Dr. Dooler sick in bed. Met Miller Spanish friend
Gubera will send stuff to Amer. Express Co.

24 Thursday. American Express, Consulate
Villa Oyarzun Spain. Mus. 11 a.m.
Back at 1.15 till 7.30 list
stuff

25 Friday am. 8.30 - 12.15 at Mus.
3 - 10.30 p.m. at Sigre with
Dr. Dooler-Jurado, 3 little fish, murels
murels, 1 octopus, 3 large shrimps murels &
small ones & Adgla. Took me to the

26 Saturday. at Mus. from 8.30 - 7.45 p.m.
except for lunch.

Gave me insects for McAlister
piece of meteorite for Merrill chipped off
will be glad to get what Merrill thinks fair
equivalent; will make cast of big meteorite
& furnish piece, would like to trade casts.

Copy of Miss Rathbone's papers & Thomson's
amplified papers. desired by Dr. Dooler-Jurado.

Sunday Dec. 27. At bus. from 7.45 a.m. to 1.15 p.m. packing specimens

After lunch returned to hotel & had severe thunder shower rain most of afternoon till after five o'clock and for the time in to good advantage getting packed up. Well vacate room in A.M.

Monday 28 Yesterday afternoon missed out the greatest find it would ever have been my good fortune to witness. Well that's that. Got to bus. at 8 a.m. to finish checking lists & begin packing vials in bottles etc. (Some had a gift) at 4 o'clock Dr. Schell-Jugend introduced me to Dr. Hentschel of the plant department from Hamburg & told me that the Meleg was in town. Had been for two weeks & would be pulling up stakes at 6 p.m. as I pushed down in a taxi with Hentschel & got a cursory view of her & her apparatus. Well, Miss Hentschel & Wüst & about 3 others whose names I didn't get.

By the way at 11.30 I rushed in taxi to get S.B. tickets to Montevideo, for then to Express Steamer where bet. main office & warehouse it took me 1 hr & more to get matters arranged. Had to wait most of time for two men who had some mixup about their baggage & in waiting there was only one attendant behind the desk & I had to wait for him. I thought I would have a fit with the running around I had to do had to visit the consulate, & the German line to thank them for all past favors & Ruben Hardman whose folks like Rambo left the States after the Civil War. Then tried to find Gregory first at one place & then another. got back to him about 3.30 when shortly after met Hentschel. after getting back from Meteor, met at 8 p.m. but got everything packed! Oh! yes also saw American Express Company again about insurance on boxes. had dinner with Schell-Jugend, had to get through in 1/2 hr because steamer left at 10, got aboard after paying hotel bill, at 9.45.

Spent on
\$12.00
taxi fare
Pens.

Taxi
a.m.
for cab
\$15.00
oro. vvv

Tuesday
Dec. 29. Spent a.m. running all around in taxi trying to get cages built and most of afternoon getting stickers promised. Packed La Palma stuff remaining on my hands in tanks. As it has alcohol must give it to express co.

Paid \$1.00 to have tin soldered up. which reminds me of packing I bought to put in fl. & coppering etc.

Also bought about 20 yards of cloth in B.A. at .35 the meter.

Over coffee which by the way for milk & rounds cost me 18 + 10 + 5 = 33. \$1.03 we granged with Accedo. His brother in law was to furnish him called a friend of his on phone at Florida & he said he would go down tomorrow to round up birds.

Wednesday

Dec. 30 At 8 to Instituto de Pesca at 9.30 to Comandante + Banks with Finley. Learned he played piano + has a grand took me from 10 to 11 at Banks. Taxi to St. Eliffone at Museum. Taxi to Instituto to Carpenter + back.

Hotel 12 - 2.30, and for Express, Alfalfa, etc.
learned at 9 p.m. that both + com. m. m. orders for birds for 1959.4.4 with out to truck.

Dec. 31. Thursday
went with Tremoleras to see about paying storage in cages till next steamer - \$10 a cr.

~~Richard S. S.~~
~~Send~~ Send La Palma Box to American Express in B.A. to send collect with other stuff cost me \$4.50
Rate of nets to him. 1.00

bet 6 and 8 called on Gregori's where name I'd seen in the paper a few days before. At night went to view Tremoleras collection with Al. Lobzée. Had 2 small glasses of beer in celebration of evening which was also Nakoma Eve.

Friday

Jan. 1

New Year's Day

Friday

Friday

Felippone left
me two letters
& 2 packages to
deliver in Wash.
& dozen picture
postals for which
I am very grateful

Jan. 2. Saturday

In a.m. went by Consulate to
mail letters to Punta Arenas, got draft for
162 Chilean pesos to send to Ronald
Stevenson, Vice Consul to pay for the cost of
handling cases & repairing one leaky one.
Went by to see Jerusalem 8.30-10
Consulate 10-10.30, Bank 10.45-11.45, usually
takes one hour as bank. On getting back to
Consulate Mr. Marsh took me home to lunch
where we had remains of New Year's turkey
& fixings. Came back at 3 p.m. took a nap
before Felippone turned up. Wants me to go
to Canalones but I tried to dodge it, I hope
successfully. While he had two beers I had
artificial lemon soda. Walked around a
bit & got lost Sat. Evening Dec 26
at Central Book store 20¢ read till quite late!

It's a very good account. I learned
a lot from it. I liked it a couple of times
before.

John

But here's the best part of New Year's 139
night. I turned in early? 10 p.m. but really?
Lay awake in bed reading a couple of magazines
& picked up in the hotel lobby. Toward eleven
the room began to feel terribly warm - I began
to smell smoke (had my window in way up over my
head in wall, in room floor below where chimney set, and
see out of window except when it is on a roof of adjoining
building it has bars, so my room is all the world like
a cell. 2 1/2 inches width of narrow single bed & by the
length of my steamer trunk longer than the bed &
about 17 feet high 2 x 2 1/2 ft. high window with
cross bars). I opened the door cracks - O.K.
looked up at the ceiling & could see flames leaping
high. you bet I got busy quick, put chain
on table, climbed over top of bed, pressed & there
a ramshackle old movie & moving picture in house reared
from hotel & around the corner was ablaze, was of
wood & corrupted in construction. Cracked but didn't
quite break through top of clothes press. got down O.K.
and dressed over my night gown in a jiffy & packed
all my stuff best I could & piled it near door. Then
hurried out in street to take a look at the hotel
inmates were gathered by door with hand baggage ready
to leave & along with proprietress ready to leave. Outside I
saw that flames were leaping up against small windows in
wing of hotel, so I hurried in & went to room where wind
was & one of the windows it was smoking & little tongues of
flame around rash & joint. I got hotel prop. by hand
& lead him up showed him to his room & I found a
bottle (carafe) of water near it & told him to get
more water. he did & then sent me couple of shenanigans

had to stay here one hr. more or less. glass fell and curtain burned & whole place badly charred, as there was a bed under window it might have been pretty serious had pane fallen in ablaze. Broh. was quite grateful offered me a drink later & today Jan 3, paid for my share in shop across street where we both happened to go at same time, this a.m. he had cancel hotel bill but he's too nice about little things. Think I won't get just what I see.

On 2nd turn back to page 138

Jan. 3, 1926 — Sunday. Got up late got camera ^{shutter} together & went to Sanata to take Gregory's costume picture (flash light) got about four views. Had dinner with them again & took nap afterward getting up at 5 to write this diary up to date.

On 2nd Wrote letters to { Thomas B.A. 5 Amer. Consul B.A. 5
American Exp. B.A. 5 " " Punta Arenas
Doello-Jurado B.A. 104

Punta Arenas

Went on Ferry ride to
Cena + ret. 30
on Jan 1st. 32

Monday Jan. 4th.

a.m. To chrt. & Mungu + Accaredo.
but found neither in.

p.m. Gregory's. In call ally left her
piece of money. came to Sanata.
Took Mr. Mungu to lunch at
my hotel.

Tues. Jan 5. With Tremblay went to see
Hobbes butterfly collect.
Went to Entang at 2.30-3 p.m. to try
in Mungu telegram.
Later visited marked.
at high saw Gregory off ^{lost picture} by ^{to ship} in bag.

Wed. Jan 6 Holiday went to Hobbes to see
rest of collection. Took walk &
Three Kings Holiday. Looked in afternoon

Thursday Jan. 7. Arranged with Express
co to take empty box by Deliffmen
unpacked few things I had in it at
Christie's

Friday Jan 8 Had to spend all morning getting
things arranged at Custom
house, repacking & taking water bottle box
there, had to use taxi
Then went to see Accaredo again
said see other man. Sat. a.m. +
ret to his Sat 5.00
p.m.

142

Sat. Jan. 9. ¹⁹²⁶₄ Missed man at Thursday
+ also ~~at~~ couldn't locate

With all the mice running around I've
had to do with the orchids I haven't
written a stroke

Sat 9 Jan. Told by Accaredo to call him at 5 p.m. but we went tired home + thought twice ^{but could find him} + went back to Crist. de Pesca much discouraged. Really looked as though I wouldn't get birds after all, was ^{truly} discouraged down out. Truly about 6.15 Tremoleras "was able to" get Garcia Capuno at home + "Praise be!" he told us that his brother in law was down on the estancia + would wait for us to come + get birds on the twelfth. ~~It~~ ^{It} was so sudden + such a relief I went weak I could have fainted. Then we rushed around to see ~~struck man~~ + he wasn't so sure he could make it

Sat. Jan. I cont'd

Monday Tuesday got in to supper at 9 p.m. after work
took a little walk & was accosted by an old
American sailor who got 25¢ and 1/2 p.m.
went home & turned in. Still pretty hot.

Sunday Jan. 10, 1926 went around + tried to
 picture of sign Barber Schopp, American
 with miniature Spanish face ~~that~~ bow hanging
 from it. Took 3 because I wasn't sure it pulled
 slide out. Went early 6.45 or so to get
 there before too many people were stirring. The ^{captain}
 Mee strolled over to boat landing or
 watch boat go to Pinar del Rio. Who should
 accord me by one of the vice consuls of the B.A.
 office, and another from Rosario. The
 had come over to see Hughes vice consul at that
 office, but though we wandered about looking for him
 couldn't find him. Went by consulate, no body home,
 went up to find Tinsley + on way met Beardsley
 who took us there. Altho no body home, went back to
 Globe where Braun + never engaged room
 + four of us sat around + talked rest had been while I
 to Lemm rode pop. Stuck around till lunch I went up
 + wrote, Beardsley here + B+W to bed. Ate lunch together
 wrote few letters incl. to Pugh, Paul, + Zittow, ~~Be~~ B+W,
 went to Poritor after lunch + I went to room. Beardsley
 came over for supper + he + I went to Poritor + sat + watched
 promenade. Was 12 pm. before we knew it, but it was pleasant to
 sit out in cool ocean breeze. # Cats with short tails. When
 his Spanish teacher said about landings wouldn't like taking
 girls up to rooms. Tremblay told me people thought him
 a worm in end of cats tail + i. cut it W.

Monday Jan. 11.

This a.m. woke by commotion by no mail
only card from Suedenaldt. & letter from
Vapacair saying there was no mail. Went to
Instituto de Pesca to look up few facts for talk
March has asked me to give Friday. At 11.30. etc.
to hotel. Afternoon writing up Friday's talk in form.
Tried to locate ostrich net but was advised
not to. rode to place in auto & then back to
Instituto. Later took car bought 2 buckets &
took them to deposits.

Jan. 12 5 a.m. = 5.30
(12) 7 dead birds + 3 live
lunch 12-5 p.m.
5-7.30 caught.
11 four birds + killed 1.
12 had lunch = 5
house built 1860

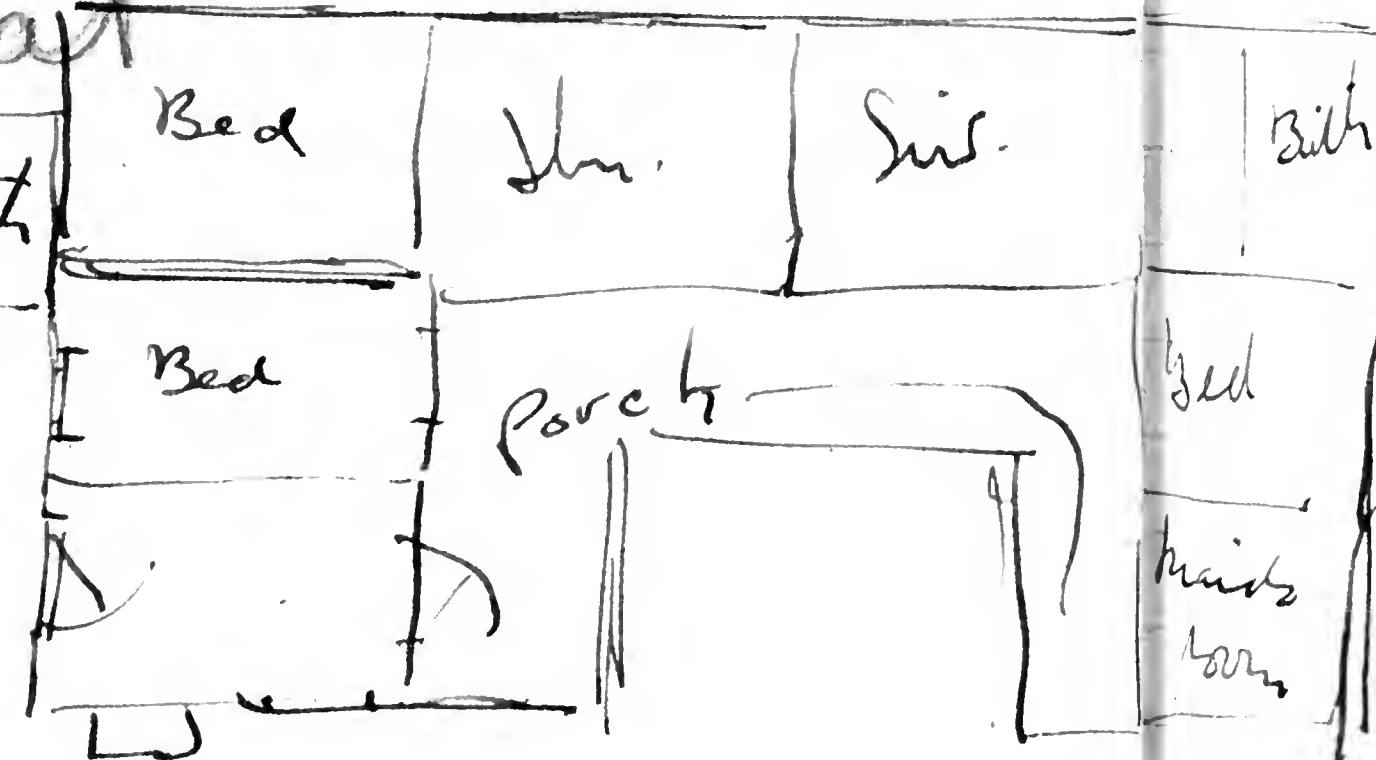

worked again at

Wed. Jan. 13 { caught 1 bird this
a.m. + one of
yesterday died }

Stayed over night, everything
cooked in mutton grease
{ Rice + tomatoes
meat
Omelette
Coffee }

night. { soup
potatoes
meat
fried eggs
Coffee }

got back to Florida
for noon day meal
Back to Garage at 9.00
Hotel at 10 p.m.

Jan. 14 Thursday. Got \$200 at Bank. 183.70
Arranged with Christman to put birds aboard
first thing
One bird died over night

Jan. 15 Friday. Had to try here to put on spigot in
wash basin in ship, bought rake.
got to garage at 5.45 to see birds in
trucks, & went down to water front with truck
didn't get birds aboard to near 7.30-8
& had to stick around to protect them.
at 11 went to hotel changed shirt called
by ju counsel & went to Amer. Assoc. lunch.
Sat. beside U.S. minister & near Mr. Brown & next Mr.
"Bill" Short Swift Cattle Buyer President of
Assoc. (Bishop was present & gave a
few words.)

Then went back to ship to see birds & did
had to find Delphine and sent chedge
nets back from museum to ship along with
box of specimens (H. very little luck). Had to
miss one another but finally found him
on ship looking for me. After a drink with
him at bar had to go ashore to get Alfred

Ordered a Garage man in a.m. could find
a taxi, so had to lug it to hotel & shift
met Greendices on way he bought me an
Agerba male & came down to see me off

Jan. 16^{Sat.} Birds had neither water or food till today
3 took water for first time

I roled with birds all day to keep
men away as much as I could.

Jan. 17 Sunday Took some bread ~~scraps~~ & pecs of
apples in afternoon ate quite a bit.

Jun. 18 Inm } Sus Bacon few minutes made 8:15 train ^{in Cape}
 Rained hard } In Santos. Bony pur. 8 highsets water
 (Jun. 19 Sue) } over bridge + fed them tremendous
 lot of stuff

Bulanton + Suedenwatt
Rudolph. Fischer

On 18th gave them a good feeding of potato cuttings.

Price in Jan
with = 6800
but I paid 10

Stayed till last baggage car was unloaded
took taxi to ship.

Jan. 19 Tue. Saw Bucm. got coffee, + got mail at Stn.
+ box from Express. Received:
Bon. 1st first German paper for German cook
+ doz. for table

Wednesday

Jan. 20 In Rio, holiday (founding of city was the
closed. Had difficulty in finding dulce.
done.

rain
hard on
leaves
Put at
6.30 p.m.

+ trouble changing money most places closed + my bill was of an obsolete series got \$71 dollars for it; at a German place.

Heater Party by the Chamberlaine.

Jan 21
Thurs.

Shirley
will grow well with birds but require to
hold them down to one meal a day.
Have to clean cage each a.m.

Jan. 22 Friday cleaned cage

Jan 23 Sat. Organized sports committee, but I
can't take part. Signed up for bridge
worked on account a little less.
Saw in Y.M. girl get her share of estate in marriage +
husband was not right to it. illegitimate child got
share in father's death (illeg. John Dieford, last street
in town).
Jan. 24 Sunday. Missed chapel this a.m.

Jan. 24 ^{share in father's death (Mg. John Duffort last through}
Sunday. Missed chapel this a.m. ^{by mail in canal.}
 + lost time because — involved me into
 playing a few rounds of chess with him.
 tried doing little work in afternoon

Jun. 25 Rain most all day birds with quite loose bowels. too much lettuce?
